

100% ALL NATURAL
FATWOOD
 FIRESTARTER

Iniciador de fuego fatwood • l'allume feu fatwood

The **easy** to use
all natural firestarter

Choose natural, it's safer

Throw all those other harmful, chemical and toxin based firestarters away. Fatwood does everything the other firestarters claim to do, but better and without additives, propellants or unnatural ingredients. Fatwood is truly the all natural firestarter, compliments of mother nature.

A must for the outdoors

Fatwood sticks are lightweight which makes them ideal for any outdoor activity. It can be kept outside in the rain or snow and still light with a single match. Lights easily even after being submerged in water! Easy to store and pack. NO odor, NO chemicals or other starters needed, and NO trash left behind!

Ready in any emergency

Our firestarter is a necessary item for any emergency preparedness or auto emergency kit. Starting a fire with fatwood, is simple, fast and guaranteed. Fatwood is WATERPROOF, impervious to insects and has an unlimited shelf life. How many other firestarters can claim that?

Lights even when wet!

When heavy wind or rainy weather makes it difficult to light your fatwood quickly, use a very sharp knife to make a fuzzy stick by cutting down 3/4 the length of the fatwood stick (not all the way though). Repeat this several times. The thinner, curly ends light quicker for an easy start.

FATWOOD IS PERFECT FOR:

- Camping**
- Hunting**
- Hiking**
- Backpacking**
- Boating**
- Fishing**
- Bar-B-Q**
- Picnics**
- Scout Outings**
